THE PRINCIPLES OF ELGINKAN GROUP

1951

Establishment

Elginkan Group, founded in 1951 is one of the leading building and heating materials manufacturer that operates with 14 production facilities and 21 companies . The modern production facilities are located in Manisa/Türkiye and sets an outstanding example of European standards. Having a vertically integrated structure, group strictly controls the supply chain processes, which guarantees the prominent product quality and service excellence for all product lines.

1957

Plumbing, Heating and Industrial Valves

Valves production under E.C.A. brand started in 1957. By the end of the 1960's, growing brand awareness of E.C.A valves had spread throughout Türkiye and it became the market leader.

We believe that quality and flexible production is the most important tool for the success of a long-

lasting organization. Therefore, we focus on customer satisfaction throughout all processes from the beginning. With its design, production, marketing and after sales services the reputation of E.C.A. brand has been known for its long term quality assurance.

1969

Steel Panel Radiators

Established at Istanbul in 1969, Radiator factory started its operations with the production of alloy aluminum pressure die casting and parts required by the automotive industry. The company started panel radiators production under the E.C.A. brand, with semi-automatic welding lines at the 1st section of Manisa Organized Industrial Zone in 1990. Enhancing its manufacturing technology in 2001, ELBA has replaced its old lines and with fully automatic and advanced production facilities.

1973

Cast Iron Radiators, Manhole Covers and Parts

Founded in 1973 and located in Bilecik / Türkiye. Cast Iron Factory manufactures cast iron products and semi-products. It produces automotive cast iron parts and components, cast iron radiators and manhole covers.

The factory is an integrated facility with its metal melting, various molding and casting lines, sand preparation units, coreroom, cleaning units, completion and assembly units, enamel preparation and enameling units.

1978

Taps and Mixers

The foundation of Taps and Mixers Factory was laid in 1957, started its operations at Istanbul in 1978.

The Taps and Mixers factory incorporates an indispensable approach for "generating the top-quality products with an advanced technology", in pursuance of meeting the high demand for faucets, taps and mixtures under the E.C.A. brand. In 1992, the company's manufacturing facilities in Istanbul moved to Manisa Organized Industrial Zone. to ensure cost effectiveness, increased planning and research-development productivity as well as optimum use of all company resources.

Main product range of the brand is composed of single lever and classical mixers, technological faucets and complementary products.

SUSTAINABILITY

E.C.A. SEREL sustainable living depends on natural resources. For 71 years, E.C.A. SEREL has designed and produced products that minimize the consumption of non- renewable natural resources. It is a holistic state of mind in every single process that means quality, innovation and design should responsively serve for the people and the environment.

Increasing environmental problems do influence our choices, also there are other aspects like features, durability, aesthetics, and materials. Sustainability requires a life- cycle approach, and it should be holistic way of thinking that analyzes the sourcing of raw materials, transport, manufacturing, packaging, and contamination as well.

MEETING DEMANDS WITH E.C.A. SEREL

Numerous international design awards confirm our business ethics. Only a basic analysis and consideration of our customers' needs allow us to design and develop fittings and sanitary products that meet all requirements in terms of function and form.

High aesthetical and functional demands characterize the expectations of our international designers and business partners

for our products. We are proud to meet the global tastes in more than 100 countries, with their very different cultural backgrounds. Numerous awards, to which new awards are added every year, show that our designs are convincing worldwide.

"A satisfied customer is the best business strategy of all."

TOUCH

76
77

When the product handle is the open position, water flow is provided with a touch to the battery body and water flow is stopped again with a touch.

When the touch feature is used, the water flow is automatically interrupted for safety after 60 seconds of water flow.
